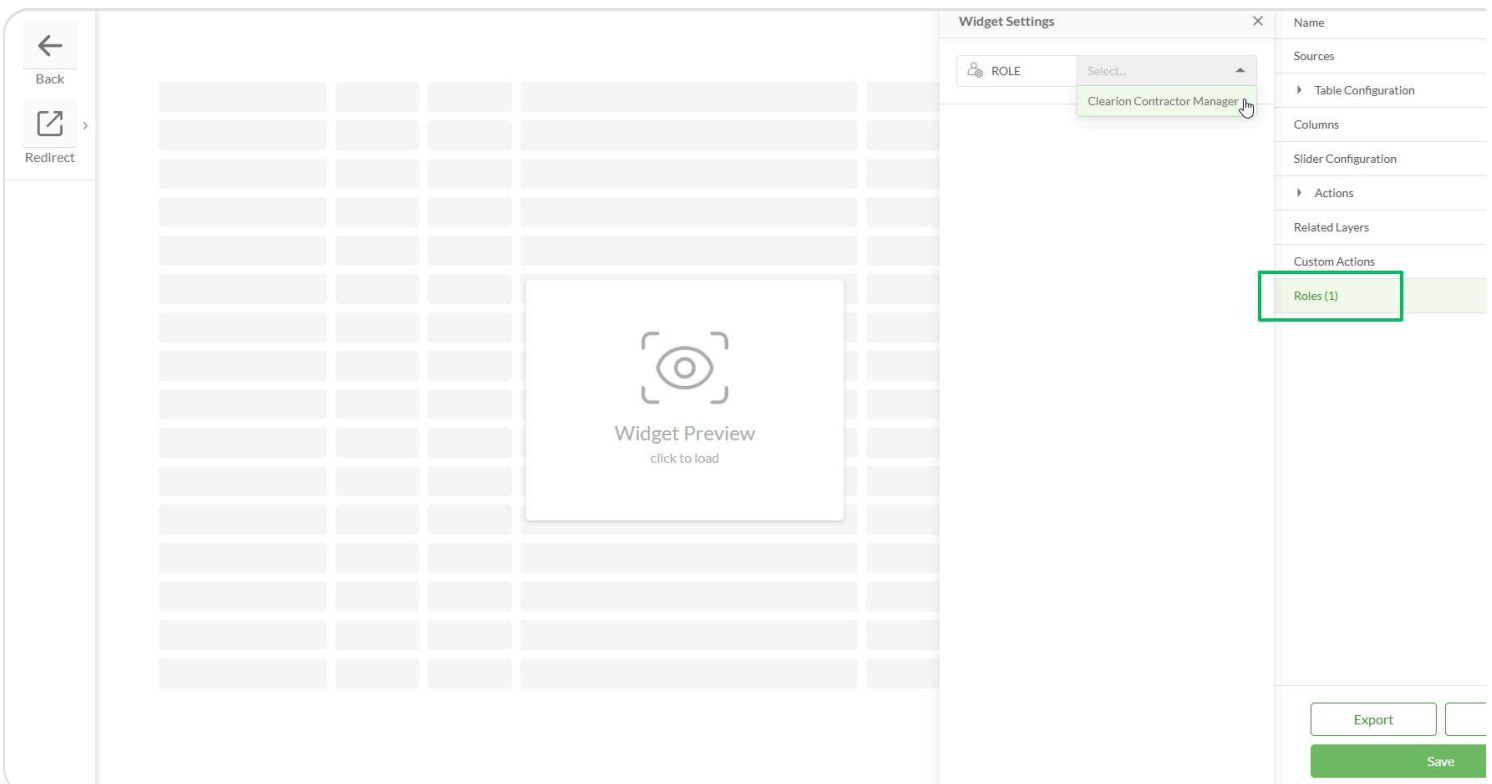

Map view showing streets and work group locations. Includes a search bar and a "Use current location" button.

Studio

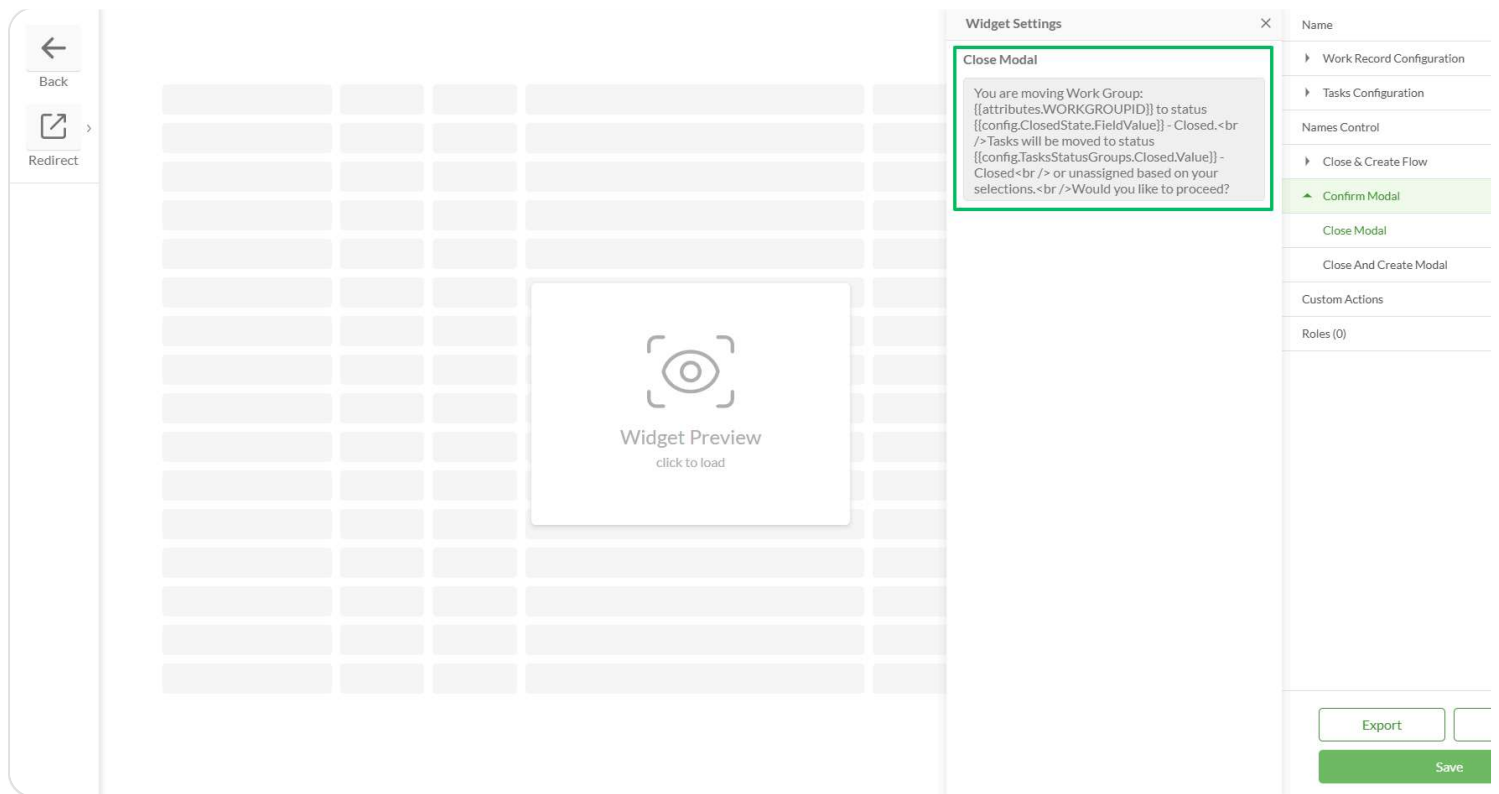

1. The ability to hide an Export button is added to the Create Feature widget
2. Added the ability to hide the Attachment widget for the Role
3. Custom actions arguments are expanded
 - `userName` and `user` are now different arguments
4. When a cloned Group was deleted then non-duplicated cloned data is automatically removed now (confirmation pop-up as also added)
 - This means that when a Group is deleted, ALL data assigned to the group will also be deleted

6. The projects and workspaces are now opened by a single click
7. Studio Navigation Bar is updated and reorganized
8. The amount of characters in the workspaces and applications slugs is increased to 50
9. Added an indicator for the number of configured Roles per widget

10. Close Work widget's confirmation pop-up text can be customized

11. An 'X' icon is added to dropdown fields on modal/slider widgets to clear the field selection
