

# RosterApps Application Changes – QA 25.08 / Production 25.10

February 3, 2025

Changes will be deployed to QA on Monday, February 3, 2025 and Production on Thursday, March 6, 2025

**ROSTERAPPS ENHANCEMENTS ..... 1**

**RESOLVED BUGS .....1**

**TESTING NOTES .....2**

## RosterApps Enhancements

None this release.

## Resolved Bugs

### **RAPD-14138 (ZD 61513 / ZD 63969) Rounding Rules applying incorrectly**

This fixes a bug related to how rounding rules were applied when an employee has abutting shifts on their calendar. When the “Require Punches For Abutting Shifts” setting is disabled within the rounding rules, it will now find the start time and end time of all abutting shifts to use to round the punch to. Previously, it was always rounding to the shift start/end time for the shift in which the punch resided.

Example:

- Employee has two abutting shifts, one from 09:00-17:00, and another from 17:00-19:00.
- “Require Punches For Abutting Shifts” setting is disabled
- Round Early Out Direction set to Forward
- Round Early Out Minutes set to 3
- Punch is sent in for 16:02
- System will round punch to 16:03 (previously it was rounding to 17:00)

### **RAPD-15361 (ZD 67637) Improved Performance of Supervisor Page**

The load time of the Supervisor home page has been improved. This was done by improving the rendering time of the following tables (lists):

- Time Off Requests
- Cancellation of Time off Award

# Testing Notes

## RAPD-15361 (ZD 67637)

The following test cases were executed and confirmed successful during ARCOS internal testing:

### 1. Supervisor Home page - Switching to a location with more than 400 Time Off Request

#### 1 Step description

Login to Rosterapps as a Supervisor

Expected Result

Supervisor home page should be displayed

#### 2 Step description

Switch to the location with approximately 50 pending TimeOff requests

Expected Result

Supervisor home page should load in a short reasonable time

#### 3 Step description

Switch to the location with approximately 400 TimeOff requests

Expected Result

Supervisor home page should load in a short reasonable time

#### 4 Step description

Switch to location 1 again

Expected Result

Supervisor home page should load in a short reasonable time

- 
- 5** Step description  
Switch to location 2 (400 requests) again  
Expected Result  
Supervisor home page should load in a short reasonable time

- 
- 6** Step description  
Click on Select of any of the existing Time Off Requests, approve/deny the requests  
Expected Result  
Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time

- 
- 7** Step description  
Repeat last step a couple of more times  
Expected Result  
Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time

## **2. Supervisor Home page - Loading location with more than 20 Cancelation request**

- 
- 1** Step description  
Login to Rosterapps as a Supervisor  
Expected Result  
Supervisor home page should be displayed

---

## 2 Step description

Switch to the location with approximately 20 time off award cancelation request

Expected Result

Supervisor home page should load in a short reasonable time

---

## 3 Step description

Switch to the location with approximately 40 TimeOff requests

Expected Result

Supervisor home page should load in a short reasonable time

---

## 4 Step description

Switch between tabs multiple times

Expected Result

Supervisor home page should load in a short reasonable time

---

## 5 Step description

Click on Select of any of the existing Time Off Requests, approve/deny the requests

Expected Result

Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time

---

## 6 Step description

Repeat last step a couple of more times

Expected Result

Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time

## 3. Supervisor Home page - Loading a location with multiple EVB type of Time off requests

---

### 1 Step description

Login to Rosterapps as a Supervisor

Expected Result

Supervisor home page should be displayed

---

### 2 Step description

Switch to the location with approximately 50 pending TimeOff requests and EVB

Cancellation request

Expected Result

Supervisor home page should load in a short reasonable time

---

### 3 Step description

Switch to the location with approximately 100 Time off request and EVB

Cancellation request

Expected Result

Supervisor home page should load in a short reasonable time

---

**4** Step description  
Switch to location 1 again  
Expected Result  
Supervisor home page should load in a short reasonable time

---

**5** Step description  
Switch to location 2 again  
Expected Result  
Supervisor home page should load in a short reasonable time

---

**6** Step description  
Click on Select of any of the existing Time Off Requests, approve/deny the requests  
Expected Result  
Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time

---

**7** Step description  
Repeat last step a couple of more times  
Expected Result  
Supervisor should be able to approve/deny the requests, user should be taken back to the Supervisor home page and it should load in a short reasonable time
