

RosterApps Application Changes – QA 25.12 / Production 25.14

March 3, 2025

Changes will be deployed to QA on Monday, March 3, 2025 and Production on Thursday, April 3, 2025

ROSTERAPPS ENHANCEMENTS 1

RESOLVED BUGS1

TESTING NOTES2

RosterApps Enhancements

RAPD-15694 Add Company Adjusted hire date to employee API

The Company Adjusted Hire Date has been added to the REST endpoints for uploading / updating Employee data.

"CompanyAdjustedHireDate" is now an optional field on:

- /api/employees/upload
- /api/employees/update

The API documentation has been updated to reflect this change -> <https://services-qa.arcos-inc.com/swagger/ui/index>

Resolved Bugs

RAPD-15738 HA Instances missing Environment name in footer

This fixes a bug with the QA instances that have been migrated to the High Availability infrastructure. The orange environment label ("QA") was missing from the header and footer.

RAPD-15662 (ZD 68532) PPC Error when Template Info is enabled

This fixes a bug that was occurring intermittently when a Time Keeper was submitting a Prior Pay Correction (PPC) that contained shifts that originated from a shift template and the "Use Template Info Instead of Shift Info" setting was enabled at the Location Admin level.

Testing Notes

RAPD-15694 Add Company Adjusted hire date to employee API

The following scenarios were verified successfully:

1. Upload Employee API - Validate CompanyAdjustedHireDate - Invalid date
2. Upload Employee API - Validate CompanyAdjustedHireDate is a optional field
3. Upload Employee API - Validate CompanyAdjustedHireDate field can be sent through the API
4. Update Employee API - Validate CompanyAdjustedHireDate - Invalid date
5. Update Employee API - Validate CompanyAdjustedHireDate is a optional field
6. Update Employee API - Validate CompanyAdjustedHireDate field can be sent through the API

RAPD-15738 HA Instances missing Environment name in footer

The following scenarios were verified successfully:

1. Login as Employee – Validate the instance name is shown in footer and header
2. Login as Supervisor – Validate the instance name is shown in footer and header
3. Login as Location Admin – Validate the instance name is shown in footer and header

RAPD-15662 (ZD 68532) PPC Error when Template Info is enabled

The following scenarios were verified successfully:

1. As a Time Keeper, validate that new PPC can be created and submitted when Shift Templates are enabled.
2. As a Time Keeper, validate that new PPC can be created and submitted when Shift Templates are not enabled.
3. As a Time Keeper, validate that Shift Templates are displayed correctly in the Time Card.
