Resolved Bugs

RAPD-14240 (ZD 62354) EVB - New Calendar Able to Select Holidays

This fixes a bug where employees were allowed to select an individual day (only holidays) when vacation bidding is being done by weeks. Now when a holiday is clicked on the calendar when selecting a preference, the entire week will be selected (as what happens when selecting a non-holiday).

Testing Notes

RAPD-14240

Preconditions:

- Employee is a participant in an existing active Bid Package Bid Round.
- The Bid Package date range includes company holidays (typically federal holidays) and the set up includes "Excluded Dates" (1 or more) from the bid package.

Test Scenario:

1. Employee > Bid Packages > Bid Round from preconditions.
2. Click the arrow beside a bid round.
3. Validate the calendar or calendars if the bid package extends over a period of months, displays separate calendars by month.
4. View each calendar and confirm:
Company holidays as defined in preconditions, reflect a star beside the date (such as a star beside Dec 25th for Christmas day if this date falls within the range of the bid package date range.
5. View each calendar and confirm:
Excluded dates as defined in preconditions, are grayed out with a white circle with an X.
6. Attempt to select an excluded date and confirm:
Individual day cannot be selected and entire week is selected.
7. Attempt to select a company holiday date and confirm:
Individual day cannot be selected and entire week is selected.
