Resolved Bugs

RAPD-16560 (ZD-74457) Shift Improvement fails to display agents to participate

Fixed a production issue where employees in a specific workgroup were unable to see or participate in a configured Shift Improvement. Expected homepage and bidding announcements did not appear, and no participation lines were visible despite a valid Shift Improvement configuration.

The fix ensures that eligible employees see the appropriate Shift Improvement announcements on the Home and Bidding pages and can participate as expected, supporting compliance with contractual timelines and reducing grievance risk tied to missed improvement opportunities.
